Are you a youth or young adult with a disability?

Consider participating in a study about developing an evidence-based toolkit to help youth with disabilities to learn about how and when to disclose their condition to potential employers.

What is this study about?

We want youth's input in developing an evidence-based toolkit to help youth with disabilities to learn how and when to disclose their condition to potential employers.

Who can participate?

We are looking for:

- Youth with a disability, aged 15-24
- Able to read/write in English
- Are currently employed, enrolled in training, or seeking employment
- Willingness to be audio recorded

What's involved?

Participants will be asked to take part in:

- Two 2-hour simulation development sessions, which includes a 30 minute de-brief discussion
- Keep a journal of your experiences before and after each simulation development session (optional)
- 1 interview (approx. 1 hour) over the phone or in-person (optional)

What are the benefits of participating?

- There are no direct benefits of participating, but it may help us to learn about disclosure and accommodation processes and how to better support youth in preparing for employment.

Participants will receive a small token of appreciation to thank them for their time. If requested we can provide a letter for volunteer hours for the time spent taking part in the study.
