About Hydrocephalus & Spina Bifida

One in 1,300 babies is born with spina bifida and even more have hydrocephalus.

HYDROCEPHALUS is a condition that results in an excessive accumulation of fluid in the brain. Without treatment, permanent brain damage or even death may occur. The most common treatment is the surgical insertion of a flexible tube (a shunt) into the brain in order to drain the fluid. It is not uncommon for individuals to have numerous brain surgeries throughout their lifetime. More than 85% of children born with spina bifida also have hydrocephalus. Hydrocephalus may be present at birth and can also be acquired at any time in life through head injury, brain tumour, the aging process and causes unknown.

SPINA BIFIDA is a birth defect that occurs within the first four weeks of pregnancy. The spinal column fails to develop properly, resulting in permanent damage to the baby's spinal cord and nervous system. Spina bifida is the number one permanently disabling birth defect in Canada. The effects of spina bifida are different for every person. It is a life-long disability with ongoing medical issues. Many people with spina bifida will need mobility supports such as braces, crutches or wheelchairs. Almost all will have some form of bladder or bowel control difficulties, learning disabilities, and other social and health issues.

Thousands of children, youth, adults and families are impacted by the challenges associated with spina bifida and/or hydrocephalus. These serious neurological conditions can cause extreme degrees of disability, the effects of which can be life threatening.

While there are no cures, **THERE IS HOPE**. Ongoing therapy, medical care and surgical treatments are available to help manage the day to day lives of impacted individuals.

Hydrocephalus Canada is dedicated to providing direct support, programs and services for all people affected by these conditions. A registered charity for over 44 years (#10799 9310 RR0001), Hydrocephalus Canada is not government or United Way funded and generates 100% of operating revenue through donations and various fundraising initiatives.
