

Page 1- Welcome Everyone!

This is a story about a little boy named Andrew and his journey with Hydrocephalus. That means that Andrew is just like you! Born and raised in Toronto, Andrew is now 7 and 3/4 years old. While he is very talented at sledge hockey, Andrew also lives with hydrocephalus (water on the brain). Join him on a journey as he goes through hospital visits, talks with the doctor and many other things related to hydrocephalus. Andrew is here to help you feel more comfortable with everything about this part of YOU! Andrew is going on an adventure, and he wants you to join him. Along the way, you'll learn lots through colouring pictures and doing other types of activities! Come on!
